Nuclear Science – People and Society: Training, Careers & Diversity

- **Training;** In order to enhance the competitiveness of our research infrastructures and its technical capabilities, we should publicise training schools and events. We propose annual training schools in experimental nuclear facilities of different sizes.

- **Carrers:** Opportunities for the Ph's in Academia, and Industry

- **Diversity:** A big effort should be realized to ensure large diversity, engaging people of different nationality, gender, age, and level of professional expertise→ INCLUSION is probably the key word

Important ítems, we need to capitalise on them
We are in Terra Incognita, Never done in any LRP

Of the 159 contributions from research groups and Countries that were accepted

Only one contribution on the Diversity Charter (of APPEC, ECFA and NuPECC) was submitted

Modus Operandi

- **Meeting by zoom March 23rd.** Many expressed their interest to work in both subgroups and favor that we have meeting together.

- The areas are interlinked and an integrated approach across sub-groups was beneficial

- However towards the open meeting of today we chose 3 people to prepare a presentation
