NuPECC Indico Instructions

https://indico.ph.tum.de/category/38/

First you need to create an account on the TUM indico site:

- Click on "Login" in the upper right corner
- Click on "create one here" below the "Login with Indico" button
- Enter your email-address and confirm with the "Send me a verification email" button
- Click on the link sent to you and complete your registration there.

Indico should automatically link your contribution with your account once the creation was successful.

If you have a TUM Indico Account already, just login and start from here!

(Please note that any other indico account (GSI, GANIL, INFN, CERN …) will not work – unfortunately indico is not that general ….)

You should now be able to upload your presentation!
